PROFILE

Commercial instinct meets operational depth.

I build trust with customers, turn data into practical decisions and improve the systems around me. My experience spans corporate automotive marketing, national lead coordination, frontline vehicle sales, workshop service advising and call-centre management.

Most recently, I have applied AI to real sales operations—designing quote-beating, product-knowledge and automated-reporting agents to help teams respond faster and work smarter.

SELECTED IMPACT

A career built around measurable improvement

2026

AI-enabled sales operations

Designed and deployed AI-powered quote-beating, product-knowledge and reporting agents within a multi-franchise call centre.

2022–23

Aftersales growth

Helped improve workshop flow, supporting sustained revenue and CSI growth; placed third in the group's aftersales value-added product competition.

2016–17

Data-led marketing

Built stock, marketing and sales reports for management while coordinating digital marketing and internet leads across a regional dealer network.

CAREER HISTORY
